Nowadays students have a lot of different types of holidays between school terms. They help teenagers to have a rest while studying. Summer holiday is the longest one. But people usually argue about it. Some people say that it is better for students to have a long summer holiday due to warm weather and a lot of free time, whereas others are convinced that terms should be longer and summer holiday is not suitable. 22

In my opinion, there is no right variant, because every option is good for students. But, if I need to choose only one option, I would prefer to have ^{two} long terms. Long terms are better for learning because students often forget all knowledge he or she gets in school during long summer holidays. Summer holidays allow students to spend time on hobbies and self development. But, in my point of view, even in July students get bored because they don't know what else to do and start to miss the school. I think summer holiday is overrated: students are always waiting for it, because they want to relax after school, but in many cases this holiday doesn't become as colorful as ~~they~~ teenagers expected. 194

To sum it up, it will be great to have five equal holidays instead of four short and one long. This way, students won't forget the material, will have enough time for rest between terms and will not waste a lot of free time in summer.
